PLANTS (SHRUBS, TREES and GROUND COVERS)

GENERAL: Provide the work of this section as indicated and specified consisting principally of supplying and planting plant materials; preparing and placing all soil required in planters, plant beds and pits; testing for unfavorable conditions; supplying all necessary soil additives, mulch, bracing materials; furnishing all organization, supervision, labor, equipment and materials necessary to complete the work; and for maintenance in accordance with the plans and specifications. The Contractor shall have examined the site and satisfied himself as to the conditions under which he is to operate or that will in any manner affect the work under the agreement.

Grades: The site for this work will be at finished grade. There are minor areas that need sculpting. Contractor is to supply and place additional topsoil for planters, planting beds and pits.

Guarantee for Plants: All plants shall be guaranteed to live for twelve (12) months. The guarantee period shall begin at the time of acceptance of the work. If plants are found to be dead, dying at any time during this period, they shall be replaced at no additional cost. All replacements shall be made with plants of the kind, and in the same manner as specified in the original planting.

Verification of Underground Utilities: The Contractor shall be responsible for verifying the exact location of all underground utilities with the Landscape Architect prior to any excavation or planting. Locations are to be discussed at the pre-installation meeting.

PLANT MATERIALS: Plants (Shrubs and Trees): Shall be provided as shown on the drawings. In general, all plant material furnished shall be well branched and proportioned, in healthy condition, free from disease and insect infestation.

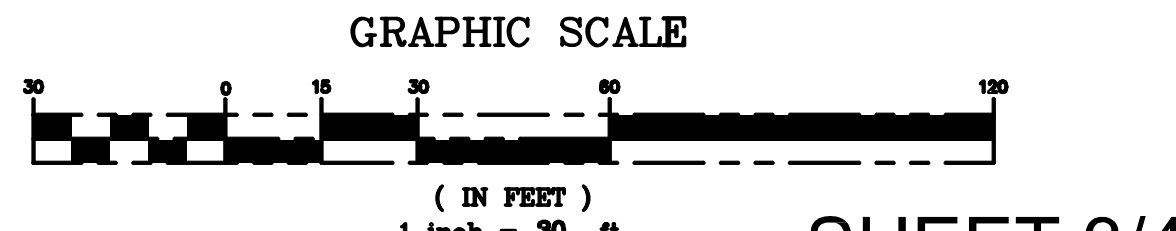

INSTALLATION: Drainage: The Contractor shall be responsible for adequate drainage from all plants.

Plant Pits: Pits for trees and large shrubs shall be circular in outline and have sloping sides and flat bottoms. The minimum depth and diameter of plant pits shall be as follows: DIAMETER - 3 times the diameter of ball or spread of roots; Depth - 12" greater than the depth of balls or roots. The bottom of all pits shall be fissured.

NOTE: All lawn areas shall be repaired and smooth after planting installation. The repairs include all grassing materials, equipment and labor.

Pruning and Painting: Pruning as required shall be performed to remove damaged branches, dead wood, and unwanted suckers. Do not paint wounds or cuts.

CLEAN-UP Excess Excavated Soil: Shall be disposed of by the Contractor off site, unless directed otherwise. On completion of the work, remove from the site all equipment and other articles used and leave the areas in a clean and neat condition, including walks, planter walls and building facade.
